

I am a user of satellite radio and depend on it for consistent service regardless of where I drive. I live in a somewhat remote area and cannot access many large market radio stations. Satellite radio provides coverage in my area and keeps me informed of current events, weather and traffic on its news stations and keeps me entertained with music and sporting event information. I urge you to reject the NAB's petition 04-160 - please allow XM radio to provide the programming that I deserve. Thank you for your attention to this matter.

Regards,

Barbara Ruggiero
